Summary

I am a software developer, with 5 years of experience, that has a great passion for building useful, high-quality apps and learning as much as I can, as well as teaching others what I have learned. My focus as of late has been full-stack and front-end web development, working with JavaScript, PHP, React, Vue and Svelte.

I have been working with my current company's framework, known as Divblox PHP, which utilizes JavaScript, jQuery, Bootstrap and PHP. I have begun working on our new, upcoming framework, Divblox JS, which uses JavaScript and Svelte as their main languages, as well as Docker and Azure for containerization and data storage.

I have built a big part of my current project, lomi, which is our new Invoicing app. I have learned a great deal about optimization and refactoring code, as well as how to write quality, reusable and scalable code that future developers can make use of in other projects. My team has taught me well and provided a unique experience to further develop myself. In my year here, we have taken lomi from a paused and partially built project to a live app that is improving constantly. For our latest release, we have built our mobile-friendly version that will be going live at the end of August 2023. You can find lomi at www.iomi.app!

Currently, I am looking to further my experiences and contribute greatly to other sectors and projects. I do have a talent for front-end development using JavaScript and Bootstrap. I have begun learning OutSystems, as I am curious about low code environments and integrating my apps with a remote database. I have played around with AWS, mostly figuring out how to host a database and web app on a server, as well as deploying and maintaining the apps I have on it.

In the future I would like to work on more front-end apps in different frameworks and languages, but I enjoy the full-stack way of building software.

Experience

Junior Software Developer

Stratusolve (Pty) Ltd

Aug 2022 - Present (1 year 1 month)

Junior Software Engineer

Freelance

Jun 2022 - Jul 2022 (2 months)

Junior Software Engineer

MIP

May 2018 - Jun 2022 (4 years 2 months)

Education

AIE, Academic Institute of Excellence

Diploma of Education, Full Stack Software and Web Development (International level
4 diploma)

Jul 2021 - Dec 2023

Skills

JavaScript • PHP • Full-Stack Development • Bootstrap (Framework) • Tailwind CSS • Mobile Web Design • Docker Products • GitHub • Scrum • OutSystems

Honors & Awards

Certificate of Achievement - MIP Holdings

Jul 2018

Certificate of Achievement for Internship Class 18.2 at MIP Holdings.

Techno Boffin 2016 Achievement Award - Western Cape Education Department

Dec 2016

WCED Techno Boffin 2016 in the 66% position.
